The Statistical Analysis Center

The Wisconsin Statistical Analysis Center is a program of the Wisconsin Council on Criminal Justice. The Center collects, analyzes, interprets and disseminates criminal justice data in Wisconsin.

In addition to the Uniform Crime Reporting Program, the Center currently operates two ongoing statewide data collection programs. The Jail Information System (JIS) collects and analyzes jail data from participating counties in Wisconsin. The Juvenile Detention Information System (JDIS) collects and analyzes information on secure detention of juveniles in the state.

In addition to operating these programs, the Center also provides technical assistance to local criminal justice agencies. Further, it provides state and local government with access to federal criminal justice statistical information. The Statistical Analysis Center also promotes the coordination and development of criminal justice statistical systems in Wisconsin.

Acknowledgements

Wisconsin Crime and Arrests - 1984 is the product of information provided by a variety of agencies. Without the excellent cooperation of the people in these agencies, the publication would not have been possible. The Wisconsin Council on Criminal Justice gratefully acknowledges the assistance of Mr. William Walluks, Wisconsin Department of Justice, Crime Information Bureau; Mr. Jay Rosenbloom, University of Wisconsin - Madison Academic Computing Center; the Federal Bureau of Investigation, Uniform Crime Reporting Program; and especially the Administrators of local law enforcement agencies and their staff whose efforts made the data available.

Wisconsin Crime and Arrests - 1984 is a publication of the Wisconsin Statistical Analysis Center, a program of the Wisconsin Council on Criminal Justice. The Statistical Analysis Center was funded for 1984 by a grant from the U.S. Department of Justice, Bureau of Justice Statistics.

Crime and Arrests in Wisconsin - 1984

Introduction

This report, prepared by the Wisconsin Statistical Analysis Center (SAC), presents data on crime and arrests in Wisconsin during 1984. From 1970 through 1981 the state Uniform Crime Reporting (UCR) Program, operated by the Crime Information Bureau of the Wisconsin Department of Justice (DOJ), collected, compiled, and reported crime and arrest data for Wisconsin. Beginning in 1971, DOJ also provided data to the national UCR system, a program of the Federal Bureau of Investigation (FBI). Effective December 31, 1981, the state program operated by DOJ was discontinued due to budget reductions. The 1981 data collected by DOJ were transmitted directly to the FBI, and the 1981 Wisconsin Crime and Arrests report, prepared by SAC, was based for the most part on information provided to SAC by the FBI. In 1982 and again in 1983 Wisconsin law enforcement agencies transmitted their UCR data directly to the FBI, but in addition provided copies of the principal offense and arrest forms to the Statistical Analysis Center. As of 1984, Wisconsin has resumed its status as part of the national UCR system. Law enforcement agencies provide complete UCR data to SAC which in turn transmits the data to the FBI via computer tape.

The National UCR Program

The national Uniform Crime Reporting Program was initiated in 1930 by the International Association of Chiefs of Police (IACP). After soliciting input from law enforcement agencies throughout the country, an IACP committee developed uniform crime definitions and reporting procedures which could be used by law enforcement agencies in every state. The FBI was designated as the national clearinghouse for UCR data. The Committee on Uniform Crime Records of the IACP continues to serve the national program in an advisory capacity. In 1956, the National Sheriff's Association also established a Committee on Uniform Crime Reports to act as an advisory body to the program. The FBI regularly receives data on reported crime and arrests from law enforcement agencies throughout the country. The data are provided either by individual law enforcement agencies or by state UCR programs which collect and compile data for their states and convey the data to the FBI. From these data the FBI publishes its annual report, Crime in the United States.

The Wisconsin UCR Program

The FBI recognized the Wisconsin Council on Criminal Justice (WCCJ) as the administrator of the Wisconsin State Uniform Crime Reporting Program effective January 1, 1984. As indicated above, the original Wisconsin UCR program, operated by DOJ, was discontinued in 1981. The program operated by DOJ from 1970 to 1981 required that all law enforcement agencies submit UCR data either directly or through the county sheriff's office. It also required that DOJ submit the prescribed data to the FBI. DOJ expanded the national UCR program's classifications to collect more detailed and appropriate data on Wisconsin crime and arrests. From the statewide UCR data, DOJ published its annual report Wisconsin Crime and Arrests, as well as quarterly, semi-annual, and other summary reports.

In November 1981, the Wisconsin Council on Criminal Justice (WCCJ) received a grant from the United States Department of Justice, Bureau of Justice Statis-

tics, to develop the Wisconsin Statistical Analysis Center. The SAC was mandated by executive order to collect and analyze criminal justice data, produce statistical reports on crime and the justice system, and promote development of criminal justice information systems. From 1981 through 1983, SAC assumed a substantial number of the functions of the state UCR program to meet the information needs of state and local criminal justice decision-makers, elected officials and interested citizens. As of January 1984, Wisconsin once again has a State UCR Program officially recognized by the FBI and part of the national system of state programs.

Issues in Comparison of this Report with Earlier Reports

Care should be exercised in making comparisons of the data in this report with the data contained in previous annual reports. Adjustments may be required for the following reasons:

--Shifting of a law enforcement agency from one population category to another based on annual re-estimation of the jurisdiction's population.

--On occasion, the Federal Government designates an additional Wisconsin county as being included in a Standard Metropolitan Statistical Area. This would shift a Sheriff's Office from the Rural Areas Category to the Suburban Sheriff's group.

--Populations are estimated for non-census years. Rates for 1984 are calculated using 1980 census data, updated with 1984 estimates.

--County totals shown in Tables 1-8 of this report are estimates which compensate for instances of missing data when appropriate. In the 1981 Wisconsin Crime and Arrests report, these totals were actual totals of data reported, even when data were missing. Thus, caution should be exercised in comparing county totals from 1982, 1983 or 1984 with 1981 totals.

--Both adult and juvenile 1981 arrest data for Milwaukee published in the 1981 Wisconsin Crime and Arrests have been revised. Readers interested in comparing 1981 Milwaukee data with other years are urged to contact SAC.

An Overview of 1983 and 1984 Crime and Arrests in Wisconsin

The following tables and maps present an overview of 1983 and 1984 crime and arrests in Wisconsin. The first table shows that violent offenses have increased 2.6 percent from 1983, while property offenses have decreased by 1.5 percent. Among the violent offenses, murder is down by 8.6 percent, forcible rape is down by 11.0 percent, robbery is down by 7.6 percent, and aggravated assault has increased by 12.9 percent. It is the increase in aggravated assault that is responsible for the overall increase in violent offenses from 1983 to 1984. It should be noted that violent offenses constituted only 4.7 percent of Index offenses for Wisconsin in 1984.

Property crimes comprise 95.3 percent of Index offenses for 1984. Among the property crimes, burglary and theft declined from 1983 to 1984, while motor vehicle theft and arson increased. Because burglary and theft are so much more numerous than motor vehicle theft and arson, the overall number of property offenses declined.

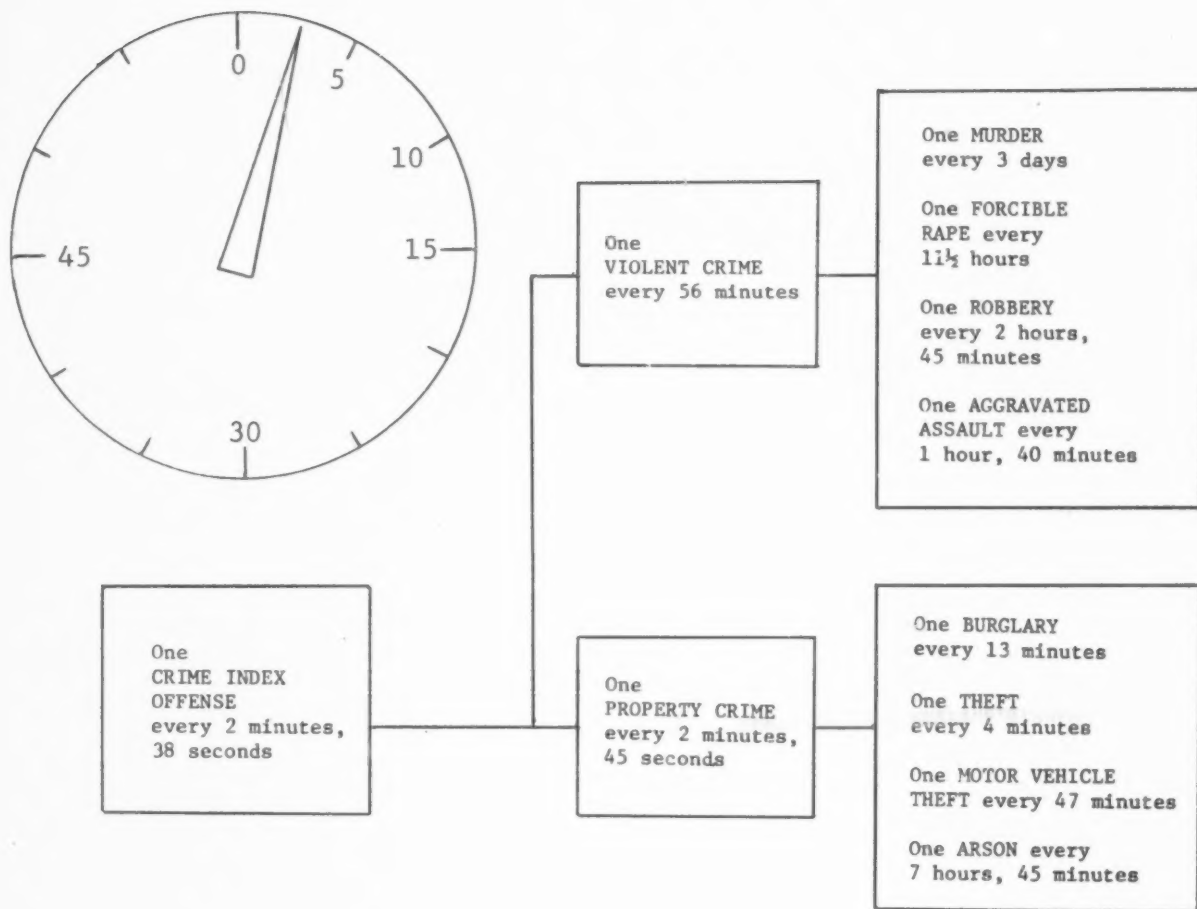

The next two tables present a comparison of arrests, both adult and juvenile, in 1983 and 1984. Adult arrests for total Index offenses declined by 4.2 percent, while juvenile arrests for total Index offenses increased by 3.7 percent. Total arrests for Index offenses, combining both adult and juvenile, declined very slightly by 0.5 percent, from 54,519 to 54,236. Arrests for non-Index offenses have risen for both adults and juveniles, so that total arrests show an increase from 1983 to 1984 for both adults and juveniles. For adults, the increase is 5.3 percent, from 177,409 to 186,860, while for juveniles the increase is 4.7 percent, from 83,404 to 87,349.

Juvenile arrests comprise 32 percent of all arrests for 1984, but they comprise 49 percent of all arrests for Index offenses. Among the Index offenses, juvenile arrests comprise 27 percent of arrests for violent offenses, and 51 percent of arrests for property offenses.

Following the set of three tables are two maps showing rates of violent and property crime in each Wisconsin county for 1984. On each map, counties are ranked in four groups according to rate of offenses per 100,000 population. The lowest quarter of the counties are shown in white, as indicated on the map legends, while the highest quarter are shown with dark horizontal hatching. The statewide rate, shown on each map, is based on the statewide number of offenses and population. This rate is within the fourth quartile because the highest crime rates are found in a relatively small number of counties with high populations.

An analysis of total Index offenses, violent offenses, property offenses, and each separate offense appears in the following section of this report. Ten-year trends in offenses, clearances, and arrest ratios are then presented, followed by data on law enforcement officers killed and assaulted.

WISCONSIN
CRIME CLOCK¹
1984

¹ The crime clock should be viewed with caution. Since it is the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of Index offense occurrence. This method of display does not imply a regularity in the commission of Index offenses; rather it shows the ratios of crimes to fixed periods of time.

ESTIMATED INDEX OFFENSES KNOWN TO
WISCONSIN LAW ENFORCEMENT AGENCIES,² 1983 AND 1984

OFFENSE	1983 ³	1984	Percent Change
Murder	128	117	- 8.6
Forcible Rape	865	770	-11.0
Robbery	3,421	3,160	- 7.6

CRIME INDEX OFFENSES

Definition:¹ Crime Index offenses are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. Attempts are included (an attempted murder is classified as an aggravated assault).

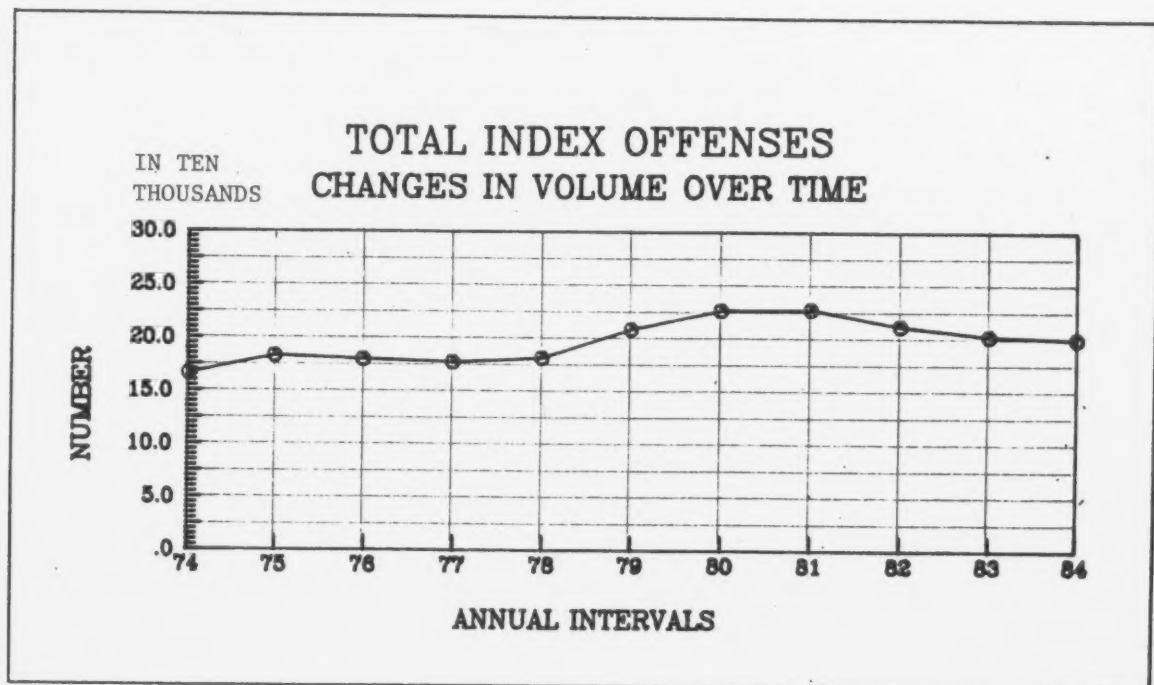

1984 Summary Analysis

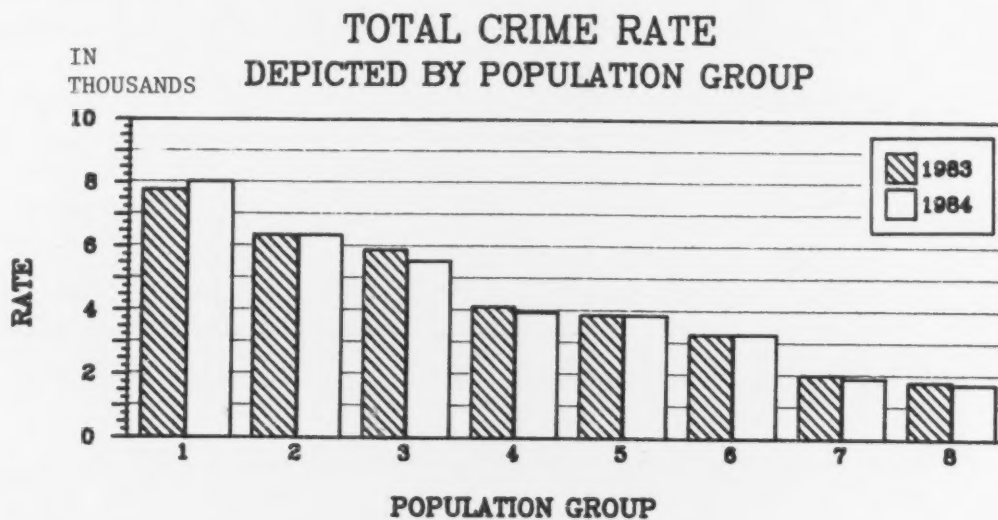

- o There were an estimated 199,860 Crime Index offenses reported during 1984, a 1.3 percent decrease from 1983.
- o One Index offense was reported approximately every 2½ minutes during 1984.
- o The Crime Index offense rate per 100,000 Wisconsin residents was 4,186.3 in 1984, a slight decrease from the 1983 rate of 4,237.9 per 100,000.
- o The 1984 rate of 4,186.3 per 100,000 is approximately twenty percent less than the 1983 rate of 5,207.4 per 100,000 residents for the entire United States.
- o In terms of the population grouping of Wisconsin jurisdictions, the larger the population category, the higher the rate of Index offenses.
- o Total Index offenses have increased by 19.5 percent between 1974 and 1984.
- o An estimated total of 54,236 persons were arrested for Index offenses in 1984. Of these, 51.3 percent were adults.
- o Overall, 23.4 percent of Index offenses were cleared in 1984. This rate varied widely, however, from 85.4 percent for murder to 16.7 percent for burglary. Clearances solely involving juveniles comprised 37.8 percent of all clearances for Index offenses in 1984.

¹Footnotes for this section may be found at the end of the section, page 76.

VIOLENT OFFENSES

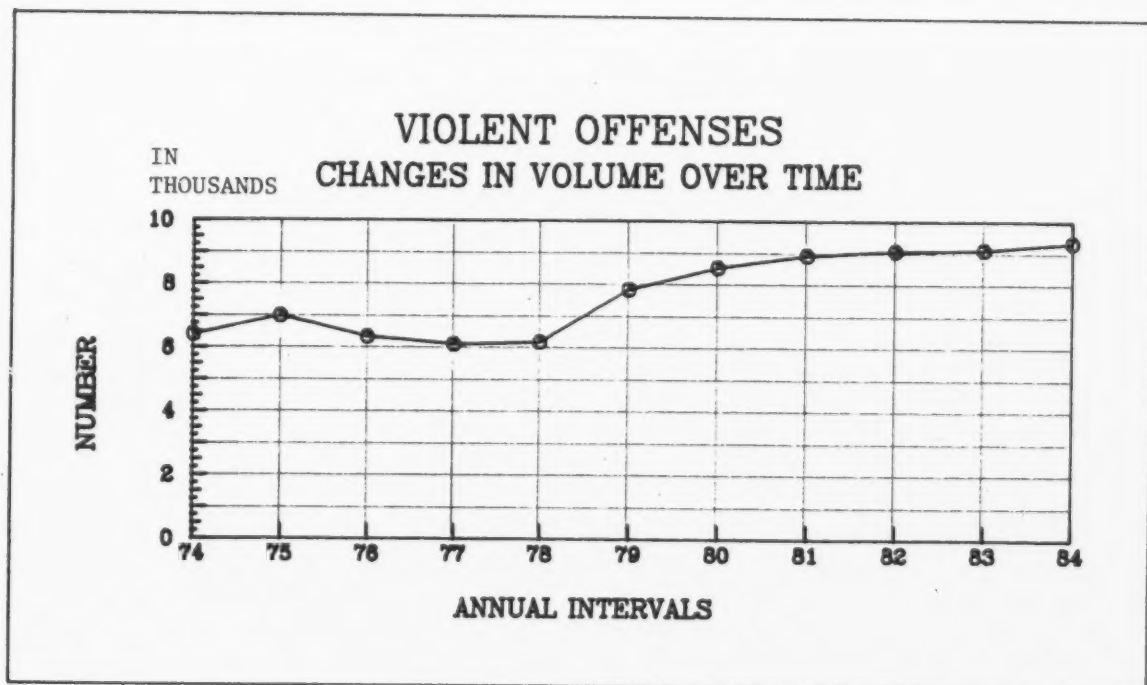

Definition:¹ Four Crime Index offenses involve face-to-face confrontation between victim and perpetrator, and are referred to as violent offenses. These are murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault.

1984 Summary Analysis

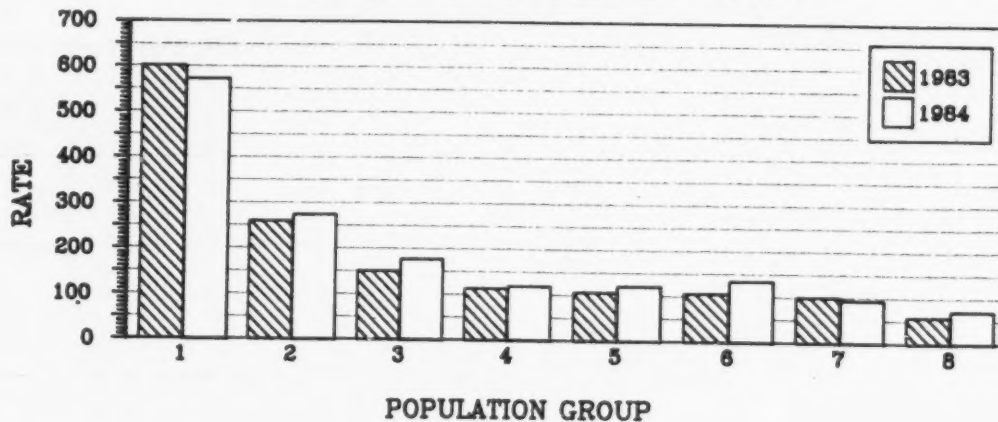

- o There were an estimated 9,350 violent offenses reported during 1984, a 2.6 percent increase from 1983.
- o Violent Index offenses accounted for 4.7 percent of the total Crime Index in 1984.
- o Approximately one violent offense per hour was reported during 1984.
- o The rate of occurrence for violent offenses in 1984 was 196.1 per 100,000 Wisconsin residents. This figure represents an increase of 2.8 percent from the 1983 rate of 190.7 per 100,000.
- o The 1984 rate of 196.1 per 100,000 is nearly 63 percent less than the 1983 rate of 529.1 per 100,000 residents for the entire United States.
- o For the population groupings of Wisconsin jurisdictions, the rate of violent offenses increased for all groups except cities over 250,000 and suburban Sheriffs' departments. Also, the 1984 violent offense rate was positively related to the size of the population group.
- o Violent Index offenses have increased 45.8 percent between 1974 and 1984.
- o An estimated total of 5,390 persons were arrested for violent offenses in 1984; this figure is approximately 5 percent higher than corresponding 1983 arrests. Approximately 73 percent of 1984 arrests were adults and nearly 45 percent of those arrested were Black.
- o Overall, 59.7 percent of violent offenses were cleared in 1984, compared to a 55 percent clearance rate in 1983. Clearances solely involving juveniles comprised 18.9 percent of all violent offense clearances in 1984, a decrease from the 20.4 percent figure in 1983.

Violent Offense Summary: 1983 and 1984²

<u>Year</u>	<u>Number of Estimated Offenses</u>	<u>Rate per 100,000 Population</u>

ARREST VOLUME FOR VIOLENT OFFENSES ADULT VS. JUVENILE

PROPERTY OFFENSES

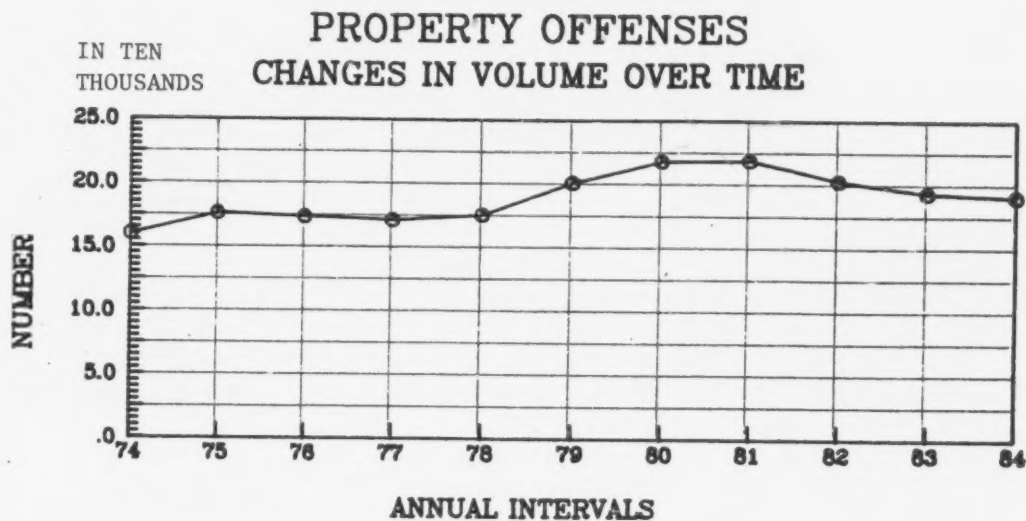

Definition:¹ Four Crime Index offenses do not involve face-to-face confrontation between victim and perpetrator, and are referred to as property offenses. These offenses are burglary, theft, motor vehicle theft, and arson.

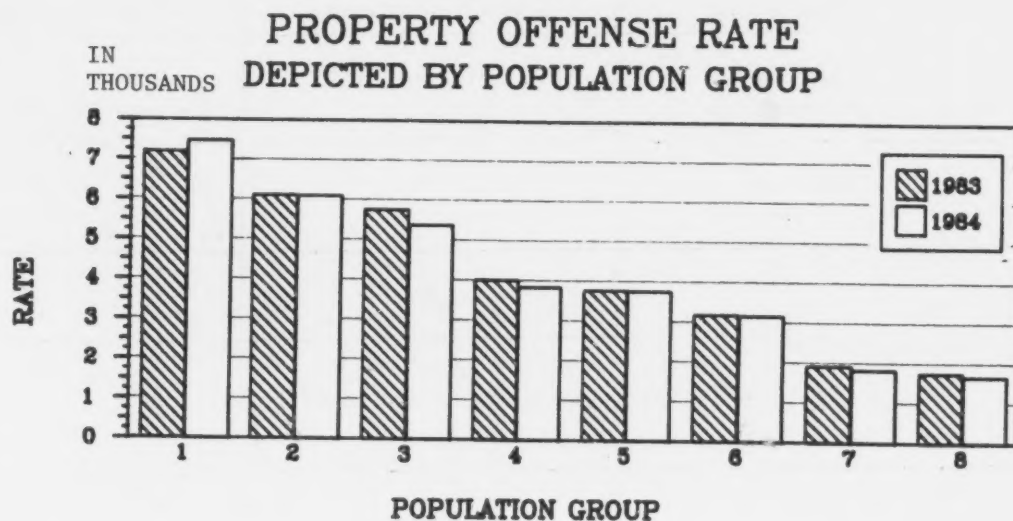

1984 Summary Analysis

- o There were an estimated 190,510 property offenses reported in 1984, a 1.5 percent decrease from 1983.
- o Property Index offenses accounted for 95.3 percent of the total Crime Index in 1984.
- o Approximately one property offense was reported every 2 minutes and 45 seconds in Wisconsin during 1984.
- o The rate of occurrence for property offenses in 1984 was 3,990.3 per 100,000 Wisconsin residents. This figure represents a decrease of 1.4 percent from the corresponding 1983 rate of 4,047.2 per 100,000.
- o The 1984 rate of 3,990.3 per 100,000 is approximately 15 percent less than the 1983 rate of 4,678.3 per 100,000 residents for the entire United States.
- o Property offense rates decreased from 1983 to 1984 for every Wisconsin population group except for jurisdictions over 250,000.
- o Property Index offenses have increased 18.5 percent between 1974 and 1984.
- o An estimated total of 48,846 arrests were made for property offenses in 1984. Approximately 51 percent of these arrests were juveniles and nearly 76 percent of those arrested were White.
- o Overall, 21.6 percent of property offenses were cleared in 1984, compared to a 20.5 percent clearance rate in 1983. Clearances solely involving juveniles comprised 40.3 percent of all clearances for property offenses in 1984.

ARREST VOLUME FOR PROPERTY OFFENSES ADULT VS. JUVENILE

MURDER

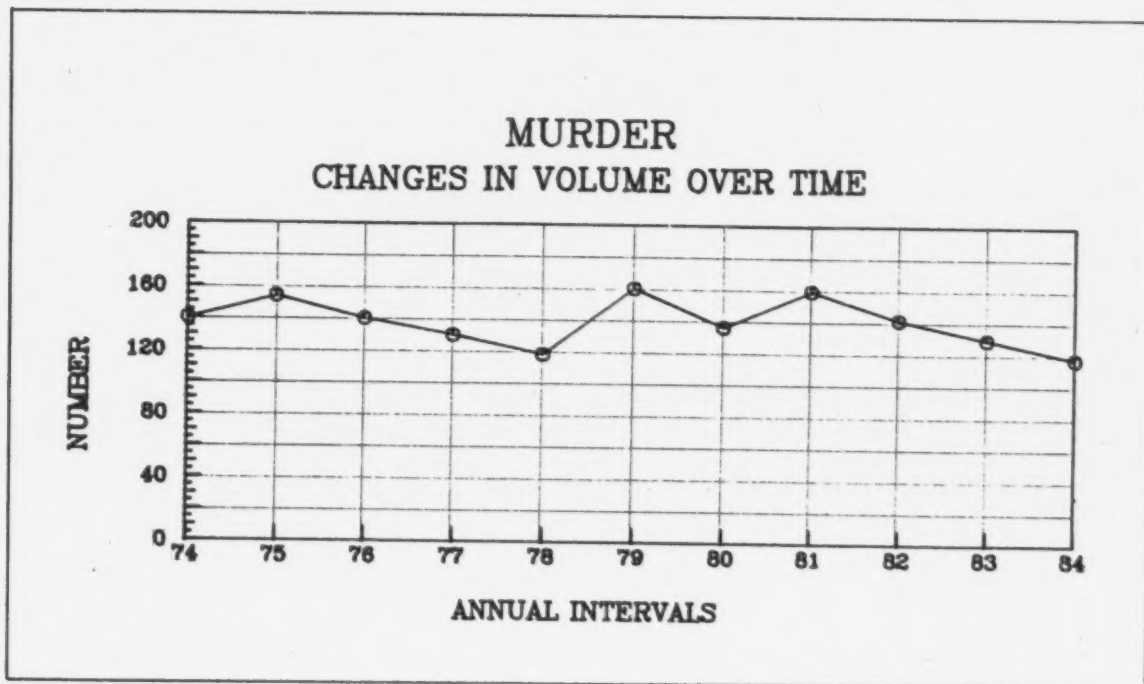

Definition:¹ Murder and nonnegligent manslaughter are the wilfull (non-negligent) killing of one human being by another. The classification of this offense, as for all other Crime Index offenses, is based on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides, which are the killings of felons by law enforcement officers in the line of duty or by private citizens during commission of the felony; and attempts to murder or assaults to murder, which are classified as aggravated assaults.

1984 Summary Analysis

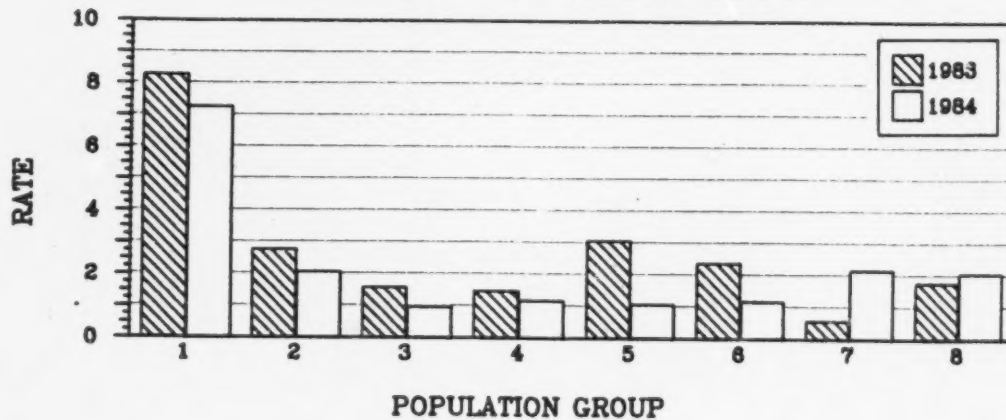

- o There were an estimated 117 murders reported in 1984, an 8.6 percent decrease from 1983.
- o Murder accounted for 0.06 percent of the total Crime Index and 1.2 percent of all violent Index offenses.
- o Approximately one murder was reported every 3 days.
- o The 1984 murder rate was 2.5 per 100,000 Wisconsin residents compared to 2.7 per 100,000 in 1983.
- o The 1984 rate of 2.5 per 100,000 Wisconsin residents was approximately 70 percent less than the 1983 rate of 8.3 per 100,000 residents for the entire United States.
- o Murder rates increased for both rural and suburban Sheriff's Departments while they declined for all police agency groups in 1984.
- o The volume of Wisconsin murders has declined 16.4 percent from 1974 to 1984.
- o Firearms accounted for 50 percent of 1984 murders while knives accounted for approximately 28 percent.
- o In those cases where the relationship of victim and offender was determined, the parties were known to each other in approximately 85 percent of 1984 murders.
- o An estimated 140 persons were arrested for murder in 1984; 85 percent of these were adults.
- o The murder clearance rate was 85.4 percent in 1984. Clearances solely involving juveniles comprised 14.1 percent of all murder clearances.

SEXUAL ASSAULT AND FORCIBLE RAPE

Definition:¹ Sexual assault is sexual contact or sexual intercourse with another person without consent of that person. Sexual assault is proscribed under Wisconsin statutes, but is not part of the Federal Uniform Crime Reporting (UCR) Program. Forcible rape is part of the Crime Index and as such is reported as part of the Federal UCR Program. It is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) is not included.

1984 Summary Analysis

This year, for the first time since 1980, data on sexual assault once again appear in the Wisconsin UCR Annual Report. This information has been collected on an incident-by-incident basis, which will permit a detailed analysis of sexual assaults and will, as well, provide information on rapes.

Information on sexual assault is vital to an understanding of crime trends in Wisconsin. Rape is not a legally meaningful category in this state. However, rape is part of the Crime Index and information on rape is vital to the national UCR program. Furthermore, many years of information on rape are available for Wisconsin, and current information on rape is valuable for purposes of comparison. A table comparing rapes in Wisconsin for 1983 and 1984 appears on the following page. Furthermore, jurisdiction-by-jurisdiction listings for rape appear in Tables 1 through 6 at the end of this publication. This listing of rape will continue in future years as long as rape continues to be part of the Crime Index.

Some summary information on sexual assaults in Wisconsin during 1984 is published in the tables on the following two pages. A more complete analysis of the sexual assault data will appear in the Statistical Analysis Center publication, Sexual Assault in Wisconsin, 1984, to be issued later this year.

Following are some highlights of the tables on the following two pages.

- o Approximately 20 percent of all sexual assaults were rapes. For victims over 16, rapes were approximately 37 percent of all sexual assaults.
- o Approximately 73 percent of all sexual assault victims were juveniles. Half of all victims were 14 years old or less; the average age for all victims was 15 years.
- o Victim sex was 87.2 percent female, while offender sex was 97.0 percent male.
- o Over 65 percent of all sexual assaults are committed by family, friends, and acquaintances and 20.8 percent by strangers; for those sexual assaults that are rapes, 51.4 percent are committed by family, friends and acquaintances and 38.6 percent by strangers.

Forcible Rape Summary: 1983 and 1984²

<u>Year</u>	<u>Number of Estimated Offenses</u>	<u>Rate per 100,000 Population</u>
1983	865	18.1
1984	770	16.1
Percent Change	-11.0	-11.0

Sexual Assaults

Summary data on sexual assaults are presented in the following tables and graphs. In the table below, sexual assaults are shown by degree for all victims, and for victims 16 and over. This is because the two most severe degrees of assault, first and second, may be so classified either by the nature of the assault or the age of the victim. Looking only at assaults of victims 16 and older shows the distribution of assaults by degree based solely on type of assault, not victim age. Most sexual assaults, even first and second degree assaults, are not rapes in the Uniform Crime Reporting definition, and this also is shown in the table below.

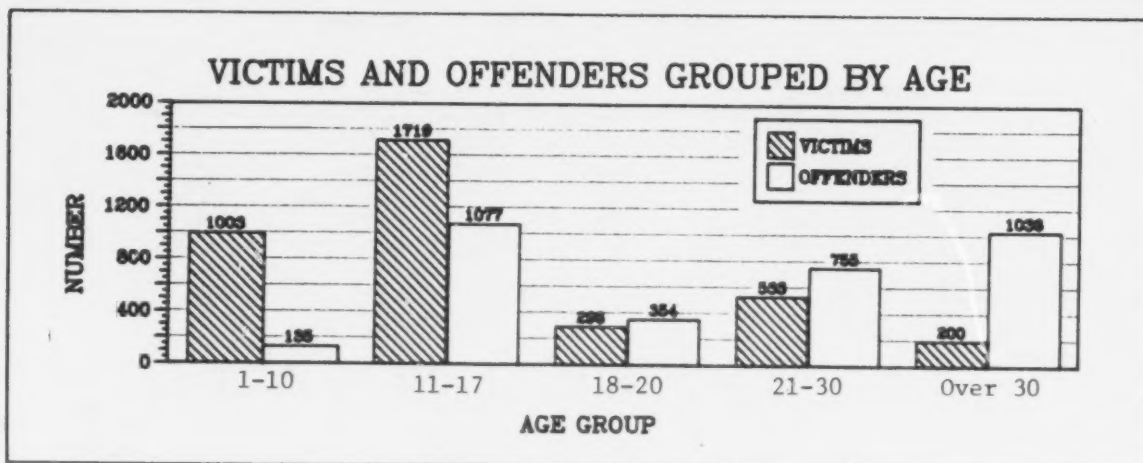

Graphs showing the age and sex of victims and offenders, and relationship between victim and offender, are presented on the following two pages. Data are also presented on arrests, victim injury, and weapons used in the commission of sexual assaults.

Sexual Assaults by Degree, for All Victims, and for Victims 16 Years Old and Older

<u>Degree</u>	<u>All Victims</u>				<u>Victims 16 and Over</u>			
	<u>All Assaults</u>		<u>Classed as Rape*</u>		<u>All Assaults</u>		<u>Classed as Rape*</u>

ROBBERY

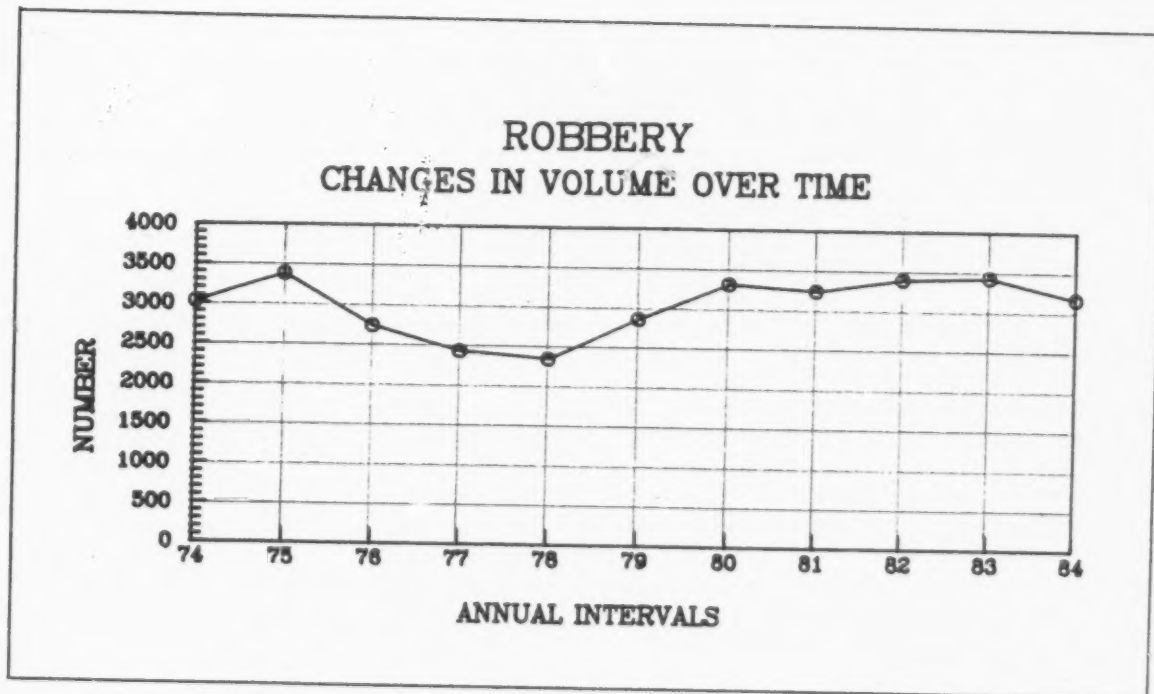

Definition:¹ Robbery is the taking or attempting to take anything of value from the care, custody or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

1984 Summary Analysis

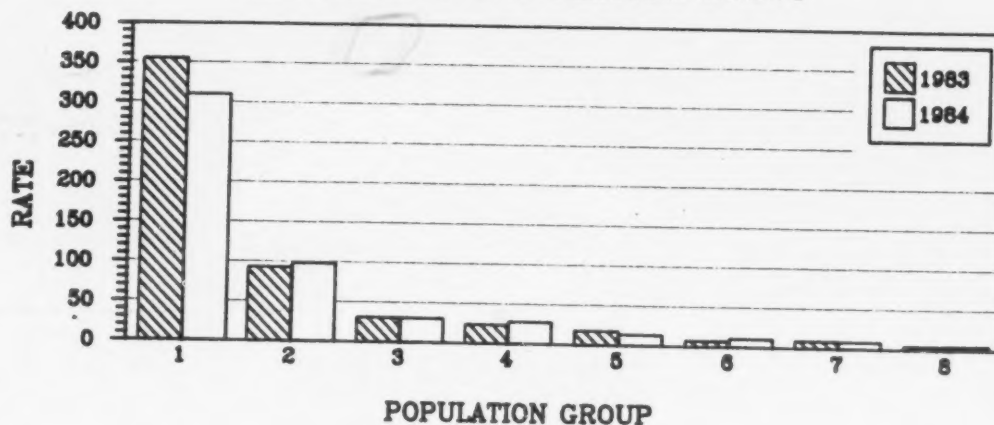

- o There were an estimated 3,160 robberies reported in 1984, a 7.6 percent decrease from 1983.
- o Robbery accounted for 1.6 percent of the total Crime Index and 33.8 percent of all violent Index offenses.
- o Approximately one robbery was reported every 2 hours and 45 minutes during 1984.
- o The 1984 robbery rate was 66.2 per 100,000 Wisconsin residents, a decline of 7.5 percent from the 1983 rate of 71.6 per 100,000 residents.
- o The 1984 robbery rate of 66.2 per 100,000 Wisconsin residents was approximately 69 percent less than the 1983 rate of 213.8 per 100,000 residents for the entire United States.
- o The 1984 robbery rate was positively related to the size of the population group of Wisconsin jurisdictions.
- o The number of estimated robberies has increased 4.5 percent from 1974 to 1984.
- o The proportion of robberies involving firearms has declined from 41 percent in 1980 to 33 percent in 1984.
- o While highway robberies accounted for 59 percent of all 1984 Wisconsin robberies, bank robberies showed the largest average amount stolen.
- o An estimated total of 1,771 persons were arrested for robbery in 1984. Approximately 67 percent of those arrested were Black while 40 percent were juveniles.
- o The robbery clearance rate was 45.1 percent in 1984, a slight increase from the 1983 clearance rate of 42.9 percent. Clearances solely involving juveniles comprised 33.1 percent of all robbery clearances.

AGGRAVATED ASSAULT

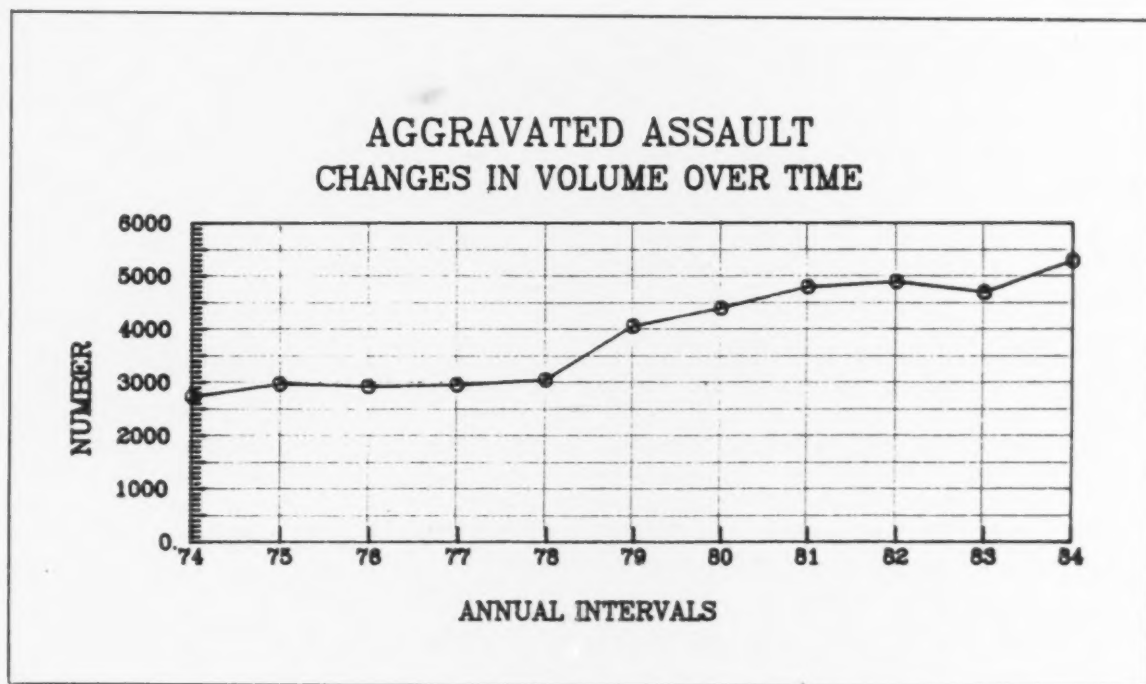

Definition:¹ Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included, since it is not necessary that an injury results when a gun, knife or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

1984 Summary Analysis

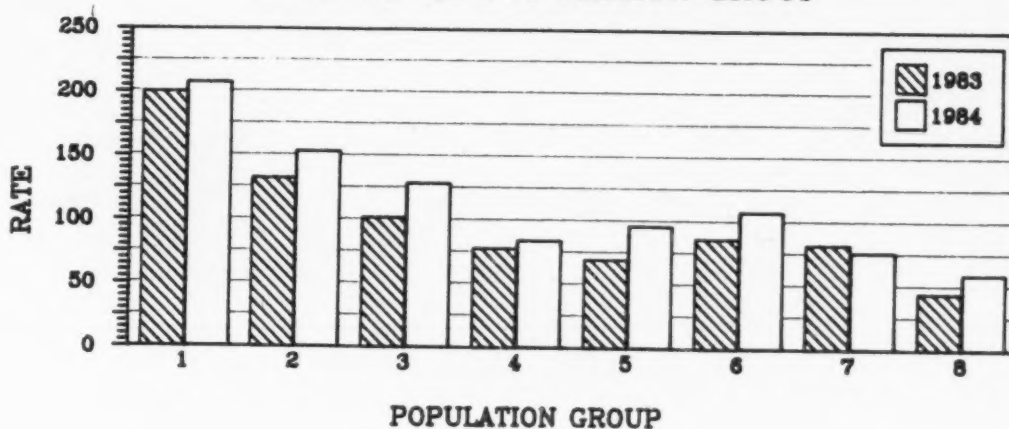

- o There were an estimated 5,302 aggravated assaults reported in 1984, a 12.9 percent increase from 1983.
- o Aggravated assault accounted for 2.6 percent of the total Crime Index and 56.7 percent of all violent Index offenses.
- o Approximately one aggravated assault was reported every hour and 40 minutes in 1984.
- o The 1984 aggravated assault rate was 111.3 per 100,000 Wisconsin residents. This figure represents an increase of 13.2 percent from the 1983 rate of 98.3 per 100,000 residents.
- o The 1984 aggravated assault rate of 111.3 per 100,000 Wisconsin residents was approximately 59 percent less than the 1983 rate of 273.3 per 100,000 residents for the entire United States.
- o The 1984 aggravated assault rate increased in all population categories except for suburban Sheriffs' Departments.
- o The number of estimated aggravated assaults has increased 93.9 percent from 1974 to 1984.
- o The proportion of aggravated assaults involving firearms has declined steadily from 26 percent in 1980 to 21 percent in 1984.
- o An estimated total of 3,056 persons were arrested for aggravated assault in 1984, an increase from the 2,791 estimated arrests during 1983.
- o The 1984 total clearance rate for aggravated assault was 67.5 percent in 1984, an increase from the 1983 clearance rate of 63 percent. Clearances solely involving juveniles comprised 13.7 percent of all aggravated assault clearances.

BURGLARY

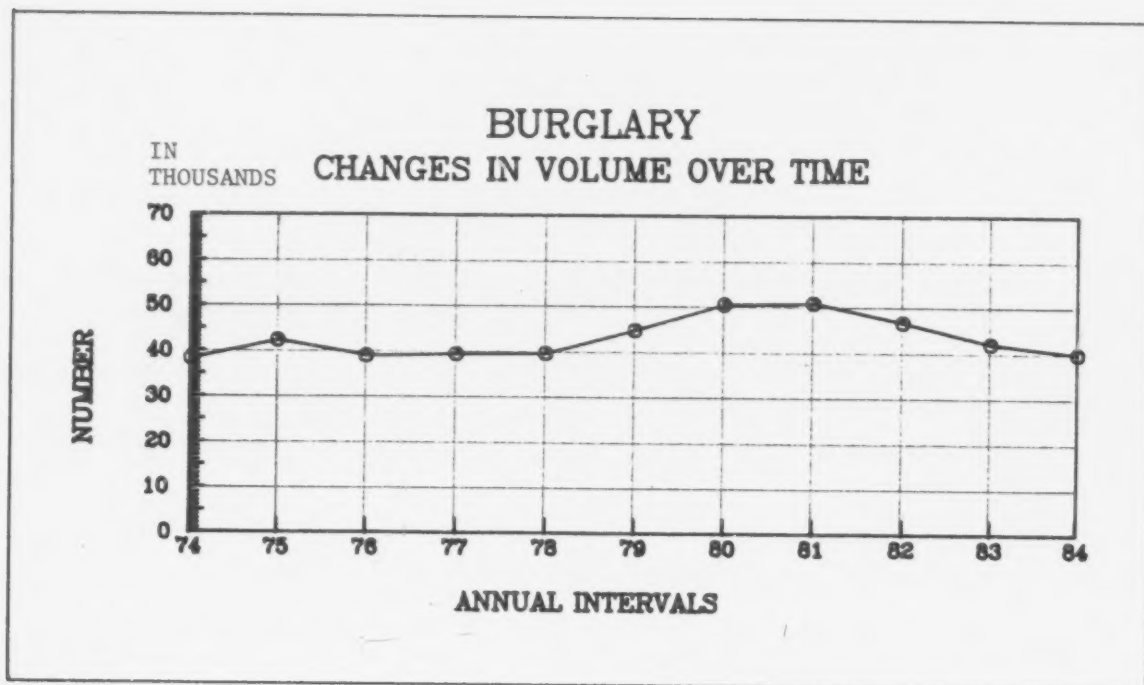

Definition:¹ Burglary is defined as the unlawful entry of a structure to commit a felony or a theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

1984 Summary Analysis

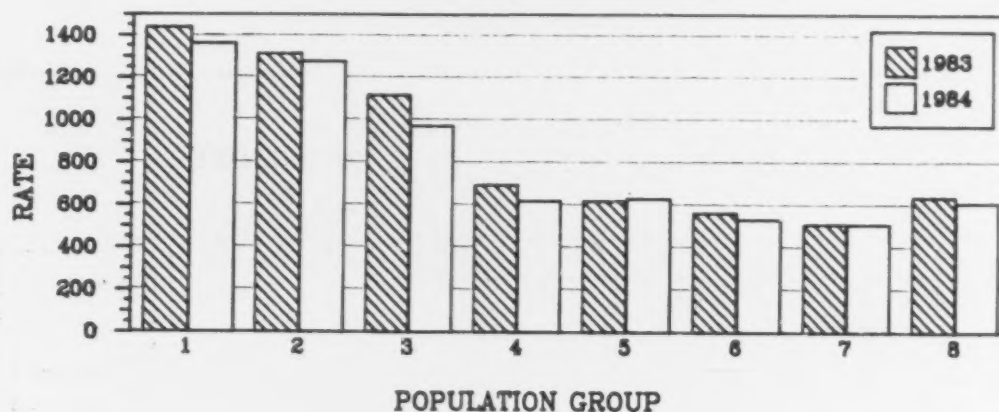

- o There were an estimated 39,755 burglaries reported in 1984, a 5.2 percent decrease from 1983.
- o Burglary accounted for 19.9 percent of the total Crime Index and 20.9 percent of all property Index offenses.
- o Approximately one burglary was reported every 13 minutes during 1984.
- o The 1984 burglary rate was 832.7 per 100,000 Wisconsin residents. This figure represents a decrease of 5.1 percent from the 1983 rate of 877.7 per 100,000 residents.
- o The 1984 burglary rate of 832.7 per 100,000 Wisconsin residents was approximately 38 percent less than the 1983 rate of 1,333.8 per 100,000 residents for the entire United States.
- o The 1984 burglary rate decreased in all population categories except those police agencies in cities between 5,000 and 9,999 persons.
- o The number of estimated burglaries has increased 4 percent from 1974 to 1984.
- o Patterns in the type of entry for burglaries were very similar from 1983 to 1984.
- o Residential burglaries constituted approximately two-thirds of all burglaries, both in terms of volume and value of property stolen.
- o An estimated total of 7,212 persons were arrested for burglary in 1984. Approximately 55 percent of those arrested were juveniles while over 77 percent were White.
- o The burglary clearance rate was 16.7 percent in 1984, a figure identical to that of 1983. Clearances solely involving juveniles comprised 39.1 percent of all burglary clearances.

THEFT

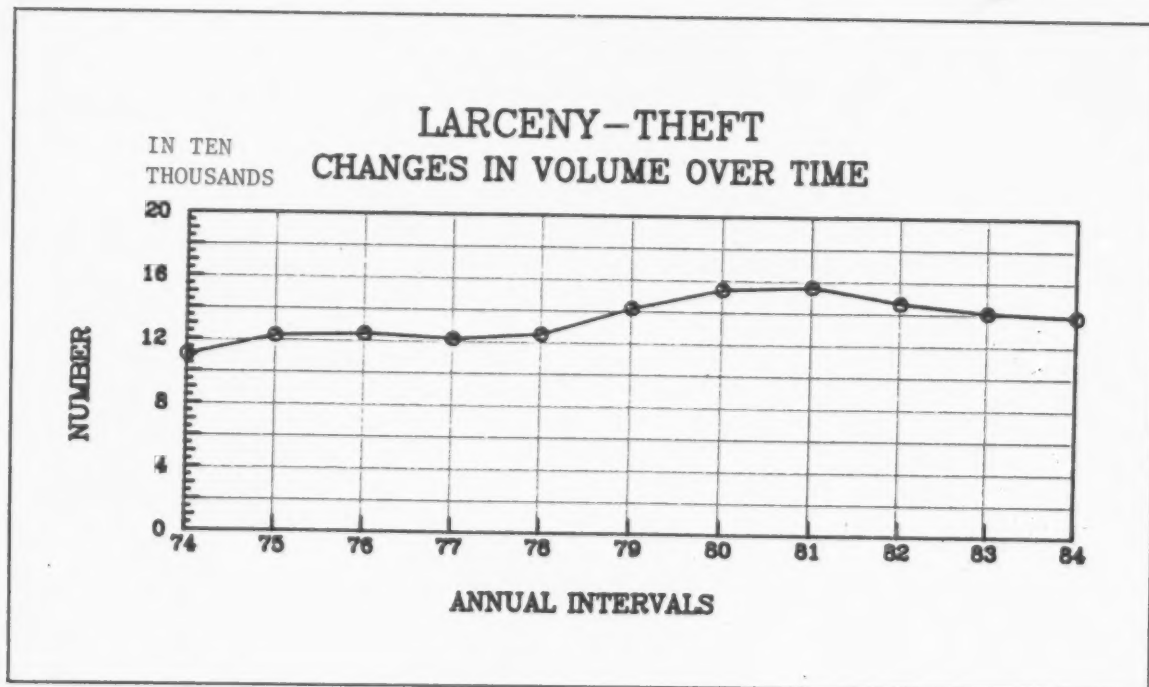

Definition:¹ Theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence or fraud occurs. In the Uniform Crime Reporting program, this crime category does not include embezzlement, "con" games, forgery and worthless checks. Motor vehicle theft is also excluded from this category for crime reporting purposes inasmuch as it is a separate Crime Index offense.

1984 Summary Analysis

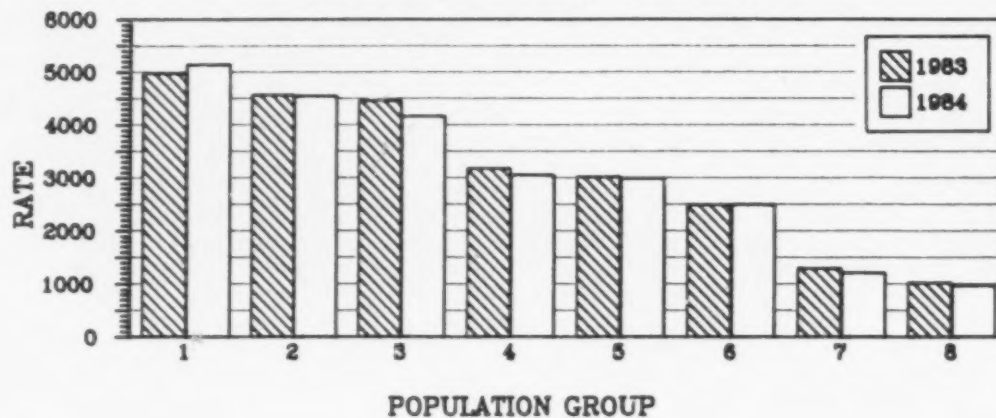

- o There were an estimated 138,398 thefts reported in 1984, a 1.6 percent decrease from 1983.
- o Theft accounted for 69.2 percent of the total Crime Index and 72.6 percent of all property Index offenses.
- o One theft was reported approximately every 4 minutes during 1984.
- o The 1984 theft rate was 2,898.8 per 100,000 Wisconsin residents, a slight decline from the 1983 rate of 2,942.9 per 100,000.
- o The 1984 theft rate of 2,898.8 per 100,000 Wisconsin residents was approximately 1 percent higher than the 1983 rate of 2,866.5 per 100,000 residents for the entire United States.
- o The 1984 theft rate declined in all population categories except those police agencies in cities over 250,000.
- o The number of estimated thefts has increased 25.4 percent from 1974 to 1984.
- o The average value stolen per theft during 1984 was \$237.
- o An estimated total of 38,561 persons were arrested for theft in 1984; approximately thirty percent of those arrested were female.
- o The theft clearance rate was 22.9 percent in 1984, a slight increase from the 1983 figure of 21.4 percent. Clearances solely involving juveniles constituted 40.7 percent of all theft clearances.

MOTOR VEHICLE THEFT

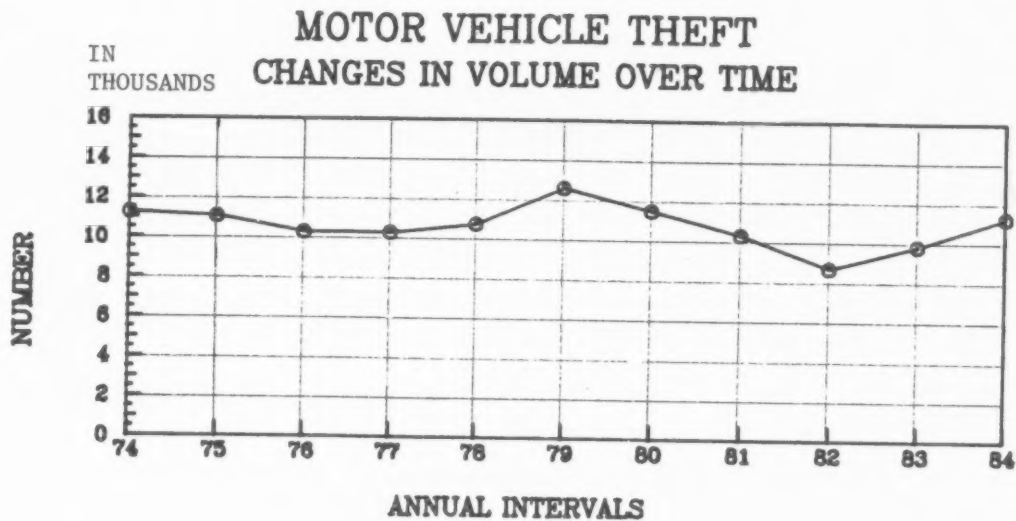

Definition:¹ Motor vehicle theft is defined as the theft or attempted theft of a motor vehicle. This definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

1984 Summary Analysis

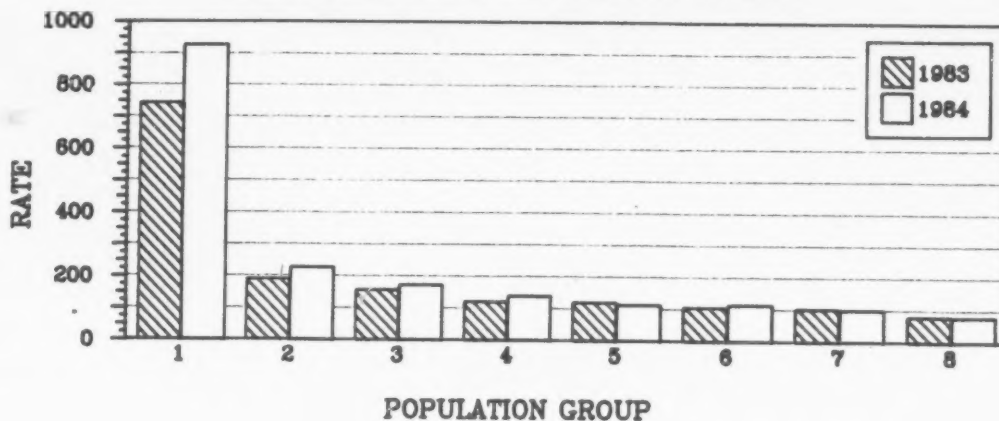

- o There were an estimated 11,232 motor vehicle thefts reported in 1984, a 14.6 percent increase from 1983.
- o Motor vehicle thefts accounted for 5.6 percent of the total Crime Index and 5.9 percent of all property Index offenses.
- o One motor vehicle theft was reported approximately every 47 minutes during 1984.
- o The 1984 motor vehicle theft rate was 235.3 per 100,000 Wisconsin residents, a 14.7 percent increase from the 1983 rate of 205.2 per 100,000.
- o The 1984 motor vehicle theft rate of 235.3 per 100,000 Wisconsin residents was approximately 45 percent less than the 1983 rate of 429.3 per 100,000 residents for the entire United States.
- o The motor vehicle theft rate increased in all population groups served by a police agency except for the 5,000-9,999 group.
- o The number of estimated motor vehicle thefts has declined 0.04 percent since 1974 although it has risen nearly 30 percent since 1982.
- o The proportion of motor vehicle thefts involving an auto has increased from 66.7 percent in 1980 to 76.7 percent in 1984.
- o Approximately 81 percent of the value of stolen motor vehicles was recovered during 1984.
- o An estimated total of 2,653 persons were arrested for motor vehicle theft in 1984, an 8.6 percent increase over the number arrested in 1983. Approximately 62 percent of those arrested in 1984 were juveniles.
- o The motor vehicle theft clearance rate was 21.5 percent in 1984, a slight decline from the 1983 figure of 22.6 percent. Clearances solely involving juveniles comprised 37.2 percent of all motor vehicle theft clearances.

ARSON

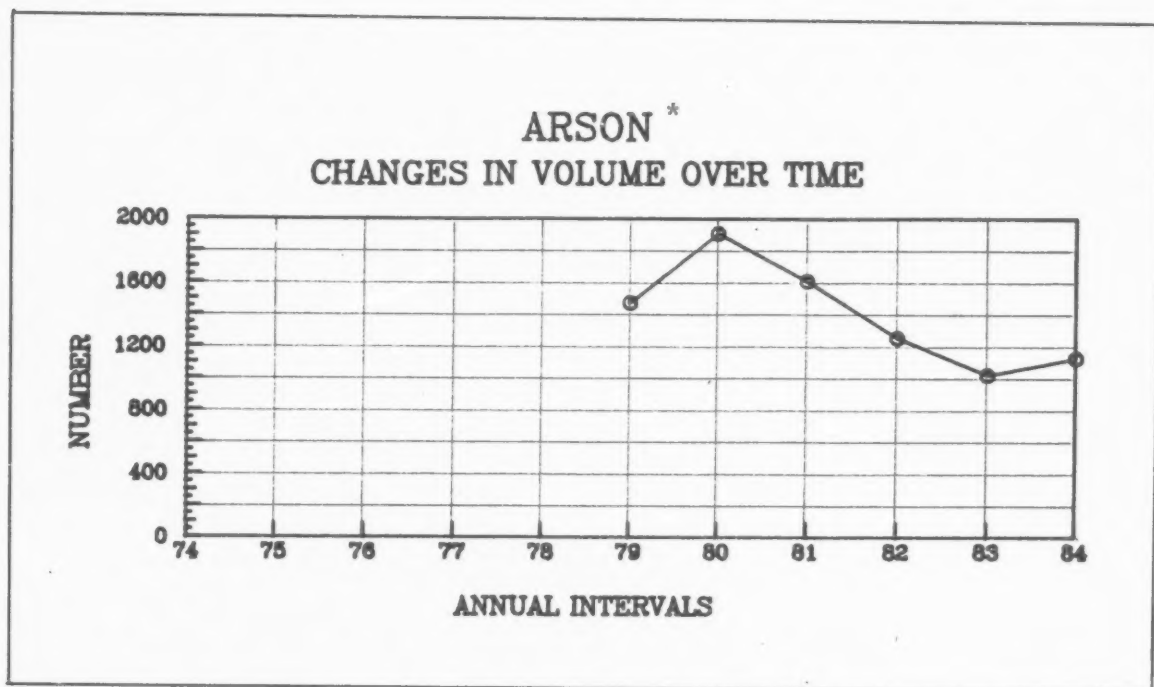

Definition:¹ Arson is defined as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc. Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

1984 Summary Analysis

- o There were an estimated 1,125 arsons reported in 1984, a 10.4 percent increase from 1983.
- o Arson accounted for 0.6 percent of the total Crime Index and 0.6 percent of all property Index offenses.
- o One arson was reported approximately every 7 hours and 45 minutes during 1984.
- o The 1984 arson rate was 23.6 per 100,000 Wisconsin residents, a 10.8 percent increase from the 1983 rate of 21.3 per 100,000.
- o The 1984 arson rate of 23.6 per 100,000 Wisconsin residents was approximately 52 percent less than the 1983 rate of 48.7 per 100,000 residents for the entire United States.
- o The arson rate increased in all population groups except those cities between 25,000 and 49,999 and suburban Sheriffs' Departments.
- o The number of estimated arsons has declined 23.5 percent since 1979.
- o An estimated total of 420 persons were arrested for arson in 1984, a 7.7 increase over the 390 arrested in 1983. Approximately 65 percent of those arrested in 1984 were juveniles and nearly 85 percent were White.
- o The arson clearance rate was 30.2 percent in 1984, a slight increase from 1983. Clearances solely involving juveniles comprised 51.9 percent of all arson clearances.

FOOTNOTES

- 1 All Index offense definitions are those used by the National Uniform Crime Reporting Program.
- 2 Figures in this and subsequent tables are estimated. Figures may not add exactly due to rounding.
- 3 Data from two jurisdictions (i.e., Wisconsin State Patrol and the Department of Natural Resources) are excluded from this table.
- 4 Reported offenses from the various campuses of the University of Wisconsin are included in the population group of the city where the campus is located.
- 5 "Suburban Sheriffs' Departments" include the following counties: Brown, Calumet, Chippewa, Dane, Douglas, Eau Claire, Kenosha, La Crosse, Marathon, Milwaukee, Outagamie, Ozaukee, Racine, Rock, St. Croix, Sheboygan, Washington, Waukesha and Winnebago.

Summary of Offense and Arrest Trends: 1974 - 1984

The following four tables present statewide data on 1) the number of Index offenses, 2) offense rates for Index offenses, 3) clearance rates for Index offenses, and 4) the ratio of arrests to offenses for Index offenses for each year from 1974 through 1984. Each table shows percent change from 1974 to 1984. Certain adjustments, noted in footnotes to each table, were made in the total Crime Index and property offense categories to make the data comparable from year to year.

The total number of known Index offenses in Wisconsin increased sporadically from 1974 through 1981, but has now decreased for three consecutive years for the first time. The number of Index offenses increased by 19.5 percent for the decade, from 166,256 in 1974 to 199,860 in 1984.¹ The increase in offense rates for the decade is slightly less than the increase in number of offenses, because the population of the state increased approximately 4.6 percent during this period.

The number of violent offenses increased by 45.8 percent for the decade, from 6,413 in 1974 to 9,350 in 1984. The number of property offenses increased by 18.5 percent for the decade, from 159,843 to 190,510. Thus, violent offenses increased over twice as fast as property offenses during the past decade. Rape and aggravated assault showed the greatest absolute increase for the decade and the greatest percent increases.

Clearance rates for all of the violent offenses except robbery have increased during the decade. That law enforcement agencies have been able to increase these rates, despite much higher levels of offenses, should be noted. Clearance rates for property offenses have increased, due to the increased clearance rates for theft.

Overall, arrest ratios have increased over the past decade, indicating that during this time arrests have increased more rapidly than offenses. However, in terms of specific offenses, this is true only of robbery, aggravated assault, and theft. Arrest ratios for murder, rape, burglary, and motor vehicle theft have decreased, indicating that, for these crimes, arrests have increased less rapidly than the number of offenses.

¹ The numbers used in this section are taken from the four tables that follow. As noted in the footnotes to the tables, the 1984 Total Index and property offense figures include arson data but, since the 1974 data do not include arson, the 1974 to 1984 percent change figures do not reflect 1984 arson offenses.

²Arson was not reported as an Index offense until 1980. In this table arson figures are included in the total Index and Property offense totals for 1979 through 1984 but they are not reflected in the percent change from 1974 to 1984.

Law Enforcement Officers Killed and Assaulted

The following tables present statewide information on law enforcement officers assaulted. No reports of officers killed were received.

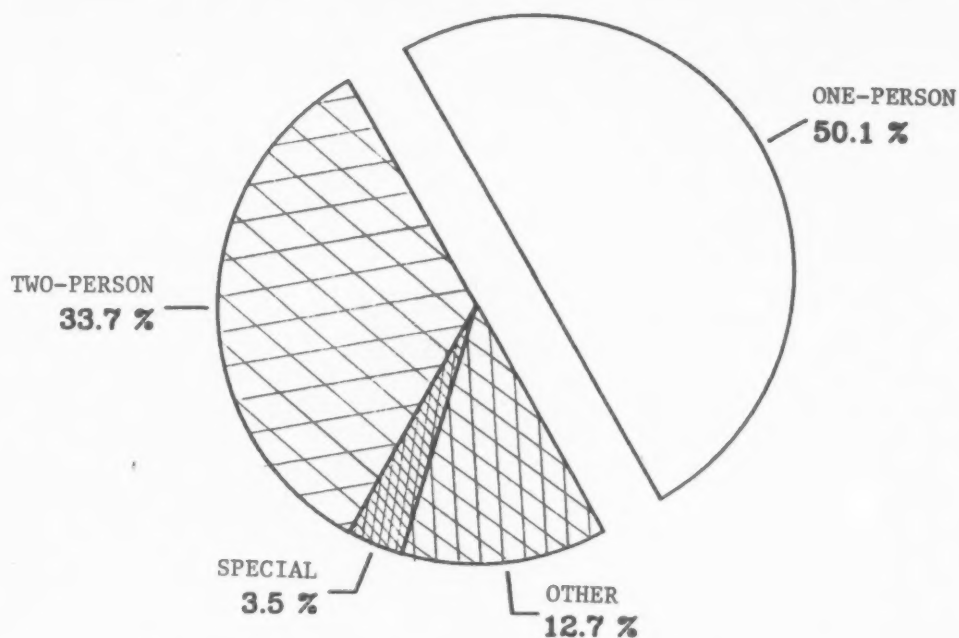

Of the 715 reported assaults, 683, or 95.5 percent, were cleared. The greatest proportion of assaults occurred during the night hours, from 10:00 p.m. through 4:00 a.m. Injuries resulted from 60 percent of reported assaults, while 90 percent of assaults involved personal weapons (hands, feet, or fists) rather than firearms, knives, or other dangerous weapons. Finally, the tables list the assaults reported by type of activity and type of assignment at the time the assault occurred.

Personal Injury by Type of Weapon

	Firearm		Knife		Other		Personal		Total	
	N	%	N	%	N	%	N	%	N	%
Injury	3	0.7	6	1.4	34	7.9	388	90.0	431	100.0

TOTAL	715	99.9

Index Offenses by County and Municipality - 1984

Table 1 shows Index offenses for 1983 and 1984 and percent changes from 1983 to 1984 for each jurisdiction. The four violent index offenses are totaled to equal violent crimes, and the four property index offenses are totaled to equal property crimes. The Crime Index is the sum of all eight offenses.

In Table 1 the number of months of data reported for each jurisdiction is listed. This information is vital to the interpretation of the table, since the data presented are the reported data at the jurisdiction level, even when fewer than twelve months of data were available. Twelve months of data were reported for 90% of the jurisdictions, while eleven months or more were reported for 93% of the jurisdictions. Data for jurisdictions reporting less than four months are not printed. However, estimates for these jurisdictions are included in county and state totals (see below).

Data for a jurisdiction which reported for fewer than twelve months in 1984 cannot be directly compared with that jurisdiction's 1983 data or with data for other jurisdictions. Thus, no percent changes are shown for these jurisdictions. However, an approximate comparison can be made using an estimate of the twelve months total. This estimate can be calculated by multiplying the available data by a correction factor which is obtained by dividing twelve by the number of months reported. (For example, if nine months of data are available for an agency, the data can be estimated for twelve months by multiplying the data by $12/9$ or 1.33 .) However, the accuracy of this approximation diminishes when only a few months of data are available. It should be applied with great caution when less than six months of data are available. This method should also be applied with caution when the number of offenses involved is small. For example, if jurisdiction A had 72 thefts in nine months and prorated them to 96 ($12/9 \times 72 = 96$) thefts for the year, while jurisdiction B had three thefts in nine months and prorated them to four thefts for the year, the estimate for jurisdiction A would be more reliable because it had a higher number of offenses.

The percent change in the number of Index offenses reported from 1983 to 1984 is shown in Table 1 for each jurisdiction for which it was possible to calculate the change. The percent change is calculated using the formula:

$$\frac{(\text{Offenses in 1984}) - (\text{Offenses in 1983})}{\text{Offenses in 1983}} \times 100 = \text{Percent Change}$$

If the number of offenses for 1983 was zero, no percent change was calculated since percent change cannot be calculated from a zero base. In addition, as stated above, no percent change was calculated for a jurisdiction unless twelve months of data were available for both 1983 and 1984.

Table 1 shows county totals for each offense and percent change from 1983 to 1984. For those counties in which not every jurisdiction reported twelve months of data for 1983 or 1984, the county totals shown are estimates. The estimated county totals were obtained by summing the estimated annual totals for each jurisdiction within the county. These estimated annual totals were obtained as described above, by multiplying the available data by a correction factor for jurisdictions with 4 months or more of 1984 data. When less than

4 months of data were present, a different method of estimation was used. For these jurisdictions, the estimate was based on the latest year of complete data, updated based on average changes experienced by agencies of similar size. When estimates are used for county totals, the totals are so labelled in Table 1 (e.g., the notation "(EST)" follows the total for Barron County).

At the end of Table 1, statewide totals of reported offenses in each category and estimates of the actual statewide totals are shown. The statewide estimates were obtained by summing the estimated offenses for each jurisdiction.

Table 2 presents offense rates per 100,000 population for Index offenses for each jurisdiction. The populations shown in this table are from Official Population Estimates for 1984, published by the Demographic Services Center of the Wisconsin Department of Administration. The population shown for each county sheriff's office is the total population of the county minus the populations of any municipalities in the county for which UCR data were reported separately. The rates shown in Table 2 are derived by taking the number of reported offenses, shown in Table 1, dividing by the population of the jurisdiction, shown in Table 2, and multiplying by 100,000. These rates permit comparisons among jurisdictions of different sizes.

As discussed in connection with Table 1, twelve months of data were available for 90% of jurisdictions. Since offense rates based on less than twelve months of data would be misleading, Table 2 presents rates only for those jurisdictions which reported twelve months of data. The county-wide and statewide rates shown in Table 2 are based on estimated numbers of offenses when necessary, as described in connection with Table 1.

Table 3 presents total clearance rates by offense and jurisdiction. Note that the 1981 edition of Wisconsin Crime and Arrests showed both total and juvenile-only clearance rates in Table 3. This year and in 1982 and 1983, however, Table 3 presents only total clearance rates, while clearance rates for juveniles are shown separately in Table 4.

In Table 3, the total clearance rate is the number of clearances, divided by the number of offenses and multiplied by 100. That is, clearances are represented as a percentage of reported offenses. Note that no clearance rate can be calculated for an offense category if there are no 1984 offenses reported, even though clearances may be reported from prior years. When no offenses have been reported, a blank space appears in Table 3. When a clearance rate of zero is shown it means that at least one offense occurred, but that there were no clearances.

Since the clearance rate is the ratio of clearances to reported offenses, it is not particularly sensitive to the problems of missing data described above for Tables 1 and 2. It is reasonable to assume that this ratio would be fairly constant as long as the number of months of data available was reasonably large. Thus, clearance rates have been presented in Table 3 for all jurisdictions for which six months or more of clearance data were present. There were 5 jurisdictions (1.8% of the total) reporting fewer than six months of data and which were excluded from the table. An asterisk (*) is printed next to the name of each of these jurisdictions.

County-wide and statewide rates shown in Table 3 are based on estimated clearances and offenses, calculated as described above in connection with Table 1. Since

county estimates could be misleading if a large proportion of data were missing, they are not printed for those counties in which jurisdictions with less than six months of data make up more than a third of the county population. A number sign (#) is printed when county estimates are omitted for this reason.

Table 4 presents information on those clearances in which only juveniles were involved. In Table 4, juvenile-only clearances are presented as a percentage of all clearances for each offense. Note that this is different from the definition used in the 1981 Wisconsin Crime and Arrests report, when juvenile-only clearances were presented as a percent of offenses. In the present report and in the 1982 and 1983 reports, the practice used in Wisconsin Crime and Arrests reports through 1980 is resumed and juvenile-only clearances are presented as a percent of total clearances. In Table 4, when a clearance rate of 0 is shown, it means that there was at least one clearance, but there were no juvenile clearances. When no clearances at all have been reported, a blank space appears in the table. In all other respects, Table 4 is constructed in the same way as Table 3, and all comments regarding Table 3 are relevant to Table 4.

JURISDICTIONS THAT REPRESENT MORE THAN 33.3% OF THE TOTAL COUNTY POPULATION

Arrests by County and Municipality - 1984

Tables 5 and 6 present data on adults and juveniles arrested by Wisconsin law enforcement agencies during 1984. The tables present the total number of arrests, the total number of Part I arrests, the total number of Part II arrests and the number of arrests for each Part I offense for each reporting agency for adults and juveniles respectively. Table 6 also presents the total number of juvenile arrests for status offenses. Status offenses are those which are only offenses because the offender is a juvenile. The UCR offenses considered to be status offenses are liquor law, curfew, and runaway violations. Since status offenses are Part II offenses, they are also included in the total number of Part II arrests. The number of Part II arrests for offenses other than status offenses can be found by subtracting the number of status offense arrests from the number of Part II arrests.

As indicated in the introduction to this report, data are not available for all twelve months of 1984 for every reporting agency. In Tables 5 and 6 the number of months of arrest data available for each reporting agency is listed. Although only the known data are presented for each jurisdiction, an estimated yearly total can be calculated for any jurisdiction with less than twelve months of data reported. The estimated totals can be calculated by multiplying the number in the table by a correction factor which can be obtained by dividing twelve by the number of months of data reported. (Thus, if eleven months of data are presented for an agency, for example, the agency's figures should be multiplied by 12/11, or 1.09.) Naturally, the more months of data reported, the more accurate will be the yearly estimates. Estimates based on a small number of months of reported data should be interpreted cautiously.

Tables 5 and 6 show, for each county, county total arrests for each offense. For those counties in which not every jurisdiction reported twelve months of data for 1984, the county totals shown are estimates. These estimates were obtained as in Table 1, by calculating and summing the estimated annual totals for each jurisdiction within the county. As in previous tables, when estimates are used for county totals, the notation "(EST)" follows the "County Total" label.

At the end of each table there are statewide totals of the reported arrests in each category and estimates of the actual statewide totals. The estimated totals were obtained by calculating estimated yearly totals, as described above, for each reporting agency with less than twelve months of data and summing the estimates for these agencies and the reported figures for the other agencies.

These tables also contain population figures for each jurisdiction. Table 5 contains adult population figures. Table 6 contains juvenile population figures. The juvenile population figures were derived from 1984 population estimates using adult and juvenile population proportions provided in the 1980 census. The population figures presented for county sheriffs' offices are the county populations minus the populations of any municipalities in the county for which UCR data are reported separately. These figures, based on the Official Population Estimates for 1984, Wisconsin Department of Administration, Demographic Services Center, can be used to calculate arrest rates for any of the jurisdictions or the State. Arrest rates are calculated by dividing

the number of arrests by the relevant population and multiplying the quotient by 100,000. This rate per 100,000 is comparable across jurisdictions of varying size.

Tables 7 and 8 present additional data on adult and juvenile Part II arrests, respectively. These tables repeat the information on total Part II offenses, population, number of months data present, and, in the case of juveniles, total status offenses from Tables 5 and 6.

In addition, Tables 7 and 8 present data on selected Part II arrests. These arrests were selected because they are among the Part II arrests which are most often the subject of inquiries, or because they are among the most numerous Part II arrests.

The construction of Tables 7 and 8 is identical to Tables 5 and 6, and all of the comments above relevant to Tables 5 and 6 also apply to Tables 7 and 8.

Statewide Arrest and Supplementary Offense Information Tables

Statewide Arrests, by Offense

The first and second of the following three tables present statewide data on adult and juvenile arrests in Wisconsin during 1984. The tables are listings of the UCR adult and juvenile arrest forms that are submitted by law enforcement agencies each month. As such, they show the total number of adult and juvenile arrests for each offense by sex, age, and race. Like other state and county level data presented in this report, these tables present estimated totals. Note that the statewide arrests in the 1981 Wisconsin Crime and Arrests report showed actual reported data, rather than estimates. In order to make comparisons between these tables and the analogous tables from the 1981 report, the 1981 data must first be adjusted, as described in the 1981 report.

Note that the state total in these listings differs slightly from the corresponding totals shown in Tables 5 and 6. This is because of small differences in the procedure to make estimates of missing data in the two types of tables.

Statewide Supplementary Offense Information

The third table, Property Stolen by Classification, presents further detail on robbery, burglary, theft, and motor vehicle theft. In addition, the monetary value of any property stolen in connection with any index offense is presented. Aggravated assault does not appear in this table, however, since, if property is stolen in the course of an aggravated assault, the offense is then classified as a robbery.

GLOSSARY

ADULT: A person 18 years of age or older.

ARREST: Taking into physical or other legal custody for committing an offense in the local reporting jurisdiction. Arrests for all criminal offenses are scored. Arrests for ordinance violations are included. Arrests for traffic offenses, with the exception of driving under the influence of intoxicants, are not scored. Included are those persons released without having been formally charged (See Juvenile Arrest).

ARREST RATE: The number of arrests for a particular offense, or group of offenses, per 100,000 population. The formula is:

$$\frac{\text{Number of Arrests}}{\text{Population}} \times 100,000$$

Arrest rates per population unit are employed to remove the effects of differing sizes of law enforcement service areas, permitting the examination of arrest on an equalized population basis. "Per 100,000 population" is generally utilized to preclude rates for infrequently occurring arrests from being unmeaningfully low.

CLEARANCE: An offense is cleared, or solved for crime reporting purposes, when at least one person is arrested, charged with commission of the offense and turned over to the court for prosecution. Provision is also made for clearance in certain "exceptional" situations.

CLEARANCE RATE (TOTAL): The number of clearances divided by the total number of offenses, expressed as a percent. The formula is:

$$\frac{\text{Number of Clearances}}{\text{Number of Offenses}} \times 100\%$$

Offenses are reported as they become known to law enforcement agencies. Clearances are scored as they are made. Therefore, it is possible for the clearance rate to exceed 100 percent for a time period. Both clearances by arrest and exceptional clearances are included.

CRIME FACTORS: Historically, the causes and origins of crime have been the subjects of investigation by many disciplines. No definitive conclusions have yet been reached; many factors affect the volume and type of crime that occurs from place to place. Caution should therefore be exercised in comparing statistical data of individual communities or counties solely on the basis of their population.

More appropriate use can be made of the statistics by relating the experience of a particular area to group averages, or by employing a ranking procedure, and encompassing both crime and other socio-economic information.

CRIME INDEX: The total of eight serious offenses used as an indicator of crime. Crime Index offenses are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft and arson. Definitions of each of these offenses are given in the section "State-wide Index Offenses and Arrests."

JUVENILE: A person 17 years of age or younger.

JUVENILE ARREST: Juveniles are scored as having been "arrested" for purposes of Uniform Crime Reporting procedures, although under Wisconsin Statutes law enforcement custody of a child is not legally considered an arrest. Arrests, in the case of juveniles, include those who have committed a crime and are taken into custody under circumstances such that, were the juvenile an adult, an arrest would be scored. All violations by juveniles where some police or other official action is taken beyond a mere admonishment, including status offenses, are included. Law enforcement contacts with juveniles where no offense has been committed are not scored as arrests. Juveniles taken into custody for their own protection, such as in neglect cases, are not scored as being arrested if they have not committed an offense. (See Arrest.)

JUVENILE CRIME: Two different measures are available through Uniform Crime Reporting. They are juvenile arrests (number, rate, and percentage of total arrests), and juvenile involvement in clearances (juvenile clearance rate).

JUVENILE INVOLVEMENT IN CLEARANCES: The percent of clearances for a given offense involving only juveniles.

$$\frac{\text{Number of Clearances Involving Only Juveniles}}{\text{Total Number of Clearances}} \times 100$$

OFFENSE RATE: The number of known offenses per 100,000 population. The formula is:

$$\frac{\text{Number of Offenses}}{\text{Population}} \times 100,000$$

Offense rates per population unit are employed to remove the effect of differing sizes of law enforcement service areas, permitting the examination of reported crime on an equalized population basis. "Per 100,000 population" is generally utilized to preclude rates for infrequently occurring offenses from being unmeaningfully low.

More sophisticated crime or victimization rate measures may also be utilized, such as residential burglaries per 100,000 residences, motor vehicle thefts per 100,000 registered vehicles, or forcible rapes per 100,000 females in typically victimized age groups.

PERCENT CHANGE: The formula is:

$$\frac{\text{Value in Current Period} - \text{Value in Base Period}}{\text{Value in Base Period}} \times 100\%$$

POPULATION: Totals as well as juvenile and adult sub-totals are based on Official Population Estimates for 1984, Wisconsin Department of Administration, Demographic Services Center.
